Professional Summary

Petroleum Engineering graduate turned Frontend Developer with a unique analytical mindset and problem-solving approach. Experienced in building responsive web applications using modern frameworks like React, Next.js, and Angular. Currently contributing to the development of MokoHost, a comprehensive website hosting platform, where I combine technical expertise with user-centered design principles to create seamless digital experiences.

Personal Projects

Weather App

Personal Project | GitHub Repository | Live Demo

Built a modern weather application with Next.js, featuring detailed weather information and a clean, responsive UI.

Nexus Host

Personal Project | GitHub Repository | Live Demo

NexusHost is a modern, responsive web hosting platform built with Next.js 15, Tailwind CSS, and Framer Motion.

Fitness Tracker

Personal Project | GitHub Repository | Live Demo

Developing a comprehensive fitness tracking application with workout plans, progress tracking, and social features like music playlists.

Personal Portfolio

Personal Project | GitHub Repository | Live Demo

Designed and developed a responsive portfolio website using TypeScript to showcase professional work and technical skills. Features modern web design principles, smooth animations, and optimized performance.

Professional Experience

Frontend Developer

MokoHost

Lead frontend development for a website hosting platform, creating intuitive user interfaces and responsive web applications. Collaborate with cross-functional teams to deliver high-quality features that enhance user experience and platform functionality. Implement modern web technologies and best practices to ensure optimal performance and scalability.
